- **4K high-brightness panel offering high image quality and high visibility**

These ultra-high resolution 4K displays with a bright 700 cd/m<sup>2</sup> deliver strong visibility even in bright conditions. Their panels are designed to mitigate glare from light sources and ambient light, reducing reflections. Even next to a window, these displays can be effectively used to share information in a classroom or conference room setting, and are well-suited to in-store digital signage placed in well-lit areas.

- **A lineup boasting reliability and flexible installation adapted to diverse use cases**

The SQ2H Series comes in seven sizes—from 43 to 98 inches—with offerings for spaces of all sizes. They can easily be rotated to support vertical-oriented content, and can tilt forward and back for easier viewing angles. And, with constant 24-hour uptime, they offer peace of mind when running displays for long hours.

- **System scalability to enable a wide range of system integration**

The SQ2H Series is equipped with various interfaces including USB Type C, compatible with DP Alt mode and power delivery of up to 60 W. The Series also utilizes the Intel® Smart Display Module (Intel® SDM) specification slot standard. By combining PC boards or interface boards, the displays can be employed in a wider range of use cases. They are equipped with USB media player functionality to display 4K content and 20 W (10 W + 10 W) of built-in speakers, precluding the need for external speakers.
